

Ansh Yadav

Product Designer

New Delhi, India · mranshyadav74@gmail.com · +91 96969 75512 · shridas.com · linkedin.com/in/ansh001

SUMMARY

Product designer, four years across enterprise data, fleet and IoT, healthcare and manufacturing software. Usually the only designer on the product — design end to end, plus testing, QA and driving fixes through engineering.

EXPERIENCE

Product Designer — SRIIO · Part-time, Remote Jun 2026 — Present

- Add one line: the product, and what you own on it.

Product Designer & Developer — CheckMed · Part-time, Remote Apr 2026 — Present

- Product design across five interconnected portals: employee, HR, vendor and internal operations.
- Designed **and built** Policy Creator end to end — the configuration layer the other four portals read from.
- Own testing and QA: raise bugs, drive fixes with the developers who own the code, and fix some directly.
- Designed and built the platform design system — an npm package with generated Markdown docs.
- Presented Policy Creator during a major enterprise client onboarding.

UI/UX Designer · Product Designer — Neuromotion Systems · Full-time, Noida Nov 2024 — Feb 2026

- Only designer in the product engineering team — design ownership across three products and the website.
- Owned testing alongside design: found bugs, drove fixes, pushed improvements through to release.

Nityom — New Delhi Aug 2022 — Nov 2024 · 2 yrs 4 mos

- Junior UI/UX Designer · Full-time Aug 2023 — Nov 2024
- UI/UX Designer · Internship, Remote Feb 2023 — Jul 2023
- Graphic Design · Internship Aug 2022 — Jan 2023

- Designed KaamHai — blue-collar hiring, workforce, payroll and leave — as a worker app and admin portal.
- Sole designer on Role, a film-industry hiring app built on reels, and on MeetX, a meetings app.
- Moved from graphic design into interface work within six months.

SELECTED PROJECTS

Query.ai — Enterprise data & AI · Sole designer, with the founder. 300+ database import methods, its own LLM, and RBAC across departments and groups; users choose how each dataset is visualised and analysed.

Fleet Management — Fleet, IoT & driver safety · Sole designer. Owner, manager and driver portals; IoT pump telemetry; AI camera detection for impaired driving, speeding and harsh braking.

Policy Creator — Healthcare platform · Designed and built end to end, ongoing. Rules and service configuration the platform's other four portals read from.

Design System — Component library · Designed and built end to end, ongoing. Ships as an npm package; developers install it and import components directly. Generates a Markdown reference so consistency rules live next to the code.

SKILLS

- | | |
|----------|--|
| DESIGN | Information architecture, wireframing, interaction design, design systems, prototyping |
| RESEARCH | User interviews, usability testing, journey mapping, competitive analysis |
| DELIVERY | Design specs, component handoff, QA and test passes, Selenium, front-end development |
| TOOLS | Figma, Adobe XD, Illustrator, Photoshop |

EDUCATION

Degree, institution Years
